

Karsen Hansen

Passionate graduate of *Gonzaga University* with a Bachelors in Computer Science and a Minor in Economics. My inherent interest in software and web development has ignited a meaningful desire to accelerate my growth with like-minded people. I'm a devoted, life-long student of programming and development with a love for learning that knows no bounds.

"I'm not getting smarter every day, just less stupid."

Experience:

1. Vroom - Co-Founder - 2012 - 2013

In 2012, online automotive giant Vroom.com began as AutoAmerica out of a single physical store in Grand Prairie, Texas. It was there I helped the initial team of 12 develop out the (basic) web presence (front-end) including primitive layouts, vehicle listings, financing tools, and digital media using html, css, and JS. This was prior to my full-stack development knowledge and even professional education - Wholly underqualified, I had the passion and connections to get the opportunity; an experience which solidified my desire for professional development. (See *references*)

2. BOEING - Co-Op Project - 2020 - 2021

The *BOEING-360* project connects airplane passengers flying 30,000 ft. above the earth with all the wonders below them. We're providing passengers with the ability to view and engage with these points of interest in a clear and meaningful way while providing an experience unlike any other, to spark new experiences.

Myself and a team of three other extremely bright and motivated individuals worked in an Agile (SCRUM) environment to build a full-stack web application serving a custom built 360 camera module, live map feed (independent of network accessibility), and a dynamically populating list of interactive POIs (points of interest) based on current position.

The custom camera module was built from NVIDIA's Jetson Nano (4g) microcomputer and is capable of capturing & live streaming in 360x220 degree, 4K HDR video over a secure local area network. (See *references*).

Education:

Nova South Eastern University

- 2012-2014
- Aimlessly studying business while bartending & casually programming for fun, as always.

Florida International University

- 2014-2015
- Realization this is not the degree for me and I need to invest in my true passion.

Awakening.

North Idaho College

- 2016 - 2018
- Associates of Science
- 3.7 GPA / Dean's List

Gonzaga University

- 2018 - 2021
- Computer Science Bachelors' | Econ Minor
- 3.8 GPA / Dean's List

Projects:

Most of my projects are on GitHub/karsen

1. Full-Stack Web apps

- Boeing-360 Co-Op Development
- User Authentication & Dashboard (comprehensive) template (RESTful)
- User Authentication (RESTful)
- To-Do
- To-Do 2.0
- Hotel Booking
- Chat App
- Secret (user authentication)

2. React.js

- My personal website on GitHub Pages
- Sorting visualizer
- Keeper (To-Do)

3. iOS Apps

- AR Memory card game
- BMI Calculator
- Climate app
- Dice app
- Magic 8 ball
- Egg Timer
- Quizzler
- Tip Calculator/Splitter
- Text adventure game

4. HTML/CSS/JS

- AutoAmerica.com
- Random, unnoteworthy projects I worked on prior to my knowledge of version control/GitHub

Primary Strengths:

_____ *Communication, teamwork, and leadership.*

Languages:

1. Python
2. Swift
3. Java
4. JavaScript
5. TypeScript
6. HTML
7. CSS/SASS (BEM)
8. C++

*** Love learning new languages ***

Frameworks & Libraries:

1. React.js
2. MongoDB / Mongoose
3. Node.js / Express.js
 - a. Node Package Manager(NPM)
 - b. Creating RESTful APIs
 - c. Web Security / Secret Management / JWTs

Cloud services :

1. Heroku
2. AWS
3. MongoDB / Atlas
4. Firebase

Version / Environment Control:

1. Git / GitHub
2. Docker

OS' / CLI's

- | | |
|----------------------------|------------|
| 1. Linux (Debian & Ubuntu) | - ZSH/Bash |
| 2. Windows 10 | - DOS |
| 3. OS X | - Bash |

Workflows / Methodologies

1. AGILE (Scrum)
2. Jira
3. Kanban / Trello
